

CHARLIE CHRISMAN

SKILLS

Languages		Frameworks		Databases	Technologies	
HTML5	EJS	Node.js	Meteor	Mongo DB	AJAX	Amazon S3
CSS3	Ruby	Express	Ruby on Rails	MySQL	Bootstrap	Github/Git
PHP	ERB	AngularJS	CakePHP	PostgreSQL	Heroku	jQuery
JavaScript	Chinese	Ionic			Mandrill	OAuth

WORK EXPERIENCE

Full Stack Web Developer (General Assembly)	<i>San Francisco, CA</i>	April 2015 – July 2015
Attended an intensive, 12-week course in full-stack web development studying JavaScript and Ruby on Rails. Projects:		
<ul style="list-style-type: none">[Ionic E-Commerce] is a hybrid web/iOS/Android front-end client to an e-commerce store that allows users to view products, add items to a cart, submit orders, register an account, login, view & update account details, and check order status. I used a turnkey e-commerce solution (Spree Commerce) as a demo web store and modified it to allow user login via API call. All the app's text strings and API endpoints are defined in a central configuration file, so it can be easily adapted to any e-commerce API. Technologies: JavaScript, AngularJS, Ionic Framework, SASS, Ruby on Rails, PostgreSQL, Amazon S3, Heroku[Pet.id] is a website to connect pet owners who have lost their pets and the general public who found a lost pet but doesn't know how to contact the owner. I was responsible for the data modelling, email functionality, user signup/login/OAuth integration, picture upload to Amazon S3, Heroku deployment, and Github repository management. Technologies: Ruby on Rails, PostgreSQL, JavaScript, Bootstrap, Mandrill, Amazon S3, Heroku[CatchPhrase.ly] is a web app where users can study flashcards using spaced repetition techniques, useful for learning a large quantity of vocabulary quickly and efficiently. I built both the backend webserver/database and the frontend user interface. Technologies: JavaScript, jQuery, EJS, Express, Node.js, Mongo DB, Heroku		
Energy Analyst (Gridium)	<i>San Francisco, CA</i>	December 2014 – Current
