					OOP	

WORK EXPERIENCE

Full Stack Web Developer (General Assembly) *San Francisco* **April 2015 – Current**

Attending an intensive, 12-week course in full-stack web development studying JavaScript and Ruby on Rails. Projects:

- [CatchPhrase.ly] - a web app where users can study flashcards using spaced repetition techniques. This is useful to learn a large quantity of vocabulary quickly and efficiently. I built both the backend webserver/database and the frontend user interface.
Technologies: JavaScript, jQuery, EJS, Express, Node.js, Mongo DB, Heroku
- [Pet.id] - a website to connect pet owners who have lost their pets and the general public who found a lost pet but doesn't know how to contact the owner. I was responsible for the data modelling, email functionality, user signup/login/OAuth integration, picture upload and Amazon S3 storage, Heroku deployment, Github repository management
Technologies: Ruby on Rails, PostgreSQL, JavaScript, Bootstrap, Mandrill, Amazon S3, Heroku

Marketing Consultant (AMCI, Geometry Global) *San Francisco* **August 2013 – Current**
